› Beyond the Threshold: The Era of Consolidation

Building lasting influence through strategic deployment

2025 opens a new chapter in which our trajectory has taken on a new dimension. After firmly establishing our role, we crossed a decisive threshold: turning our commitment into a structuring force capable of shaping our economic landscape over the long term. The growing involvement of the diaspora has reinforced this momentum, giving rise to a dynamic that is fostering institutions that are more resilient, more inclusive, and more clearly focused on the future of the continent.

In an environment where rapid transformation has become the norm, we designed and deployed support approaches that renew conventional practice. Tailored to promising SMEs, these approaches combine expertise, proximity, and strategic vision. The spaces for growth that we have created offer far more than financial support: they help propel businesses to a new level. The progress achieved this year powerfully illustrates our ability to generate impact where it is most needed.

This progress is first and foremost the result of mutual trust and a rare alignment among our teams, our partners, and all those who share this collective ambition. Thanks to this cohesion, we exceeded our initial objectives and laid the groundwork for new performance standards in Burkina Faso, Mali, Benin, and Côte d'Ivoire.

Looking ahead, our ambition remains firmly focused on expansion: to become one of the leading drivers of investment flows in Francophone West Africa, supporting the emergence of an entrepreneurial ecosystem that is robust, forward-looking, and deeply inspiring.

We invite you to explore the pages that follow, which faithfully reflect this year's defining achievements and the horizons we are preparing to reach.

2025

I. WHO WE ARE

Founded in **Paris in 2015** and supported by a network of more than **50 executives, senior managers, and international professionals,** our multidisciplinary expertise extends from Paris to Washington, Montreal, Ouagadougou, Abidjan, and beyond.

Drawing on experience within leading organizations such as Investisseurs & Partenaires, PwC, BCG, Google, Accenture, Deloitte, BOAD, AfDB, Ecobank, and IFC, together with our entrepreneurial drive, we have earned recognition as experts in **the economic viability of impact-driven projects.**

We address the challenge of capital access for African businesses across the entire value chain, from early-stage SMEs to large international companies.

Our Lines of Business

ACCELERATION	INVESTMENT	ADVISORY
› Acceleration programs for high-impact SMEs	› Structuring and management of investment vehicles; › Startup studio	› Fundraising; › Investor due diligence; › Market studies

In 2025, all three of our lines of business experienced high demand. This operational review, based on execution and results, confirms the strength of our vision.

ACCELERATION AND FINANCING PROGRAMS

Forth investment

A. ACCELERATION PROGRAMS

1. Superstar Impact Business

› Measurable results in support of SME sustainability

The **Superstar Impact Business program**, implemented in Burkina Faso through a **partnership between ForthInvestment and Oxfam in Burkina Faso,** with **financial support from the Basque Cooperation, officially closed in 2025.** Designed to strengthen **the structuring and long-term sustainability of impact-driven SMEs,** it focused on key sustainable development sectors, including agriculture, the circular economy, renewable energy, technological innovation, water, and sanitation.

The program was rolled out in the municipalities of **Ouagadougou**, **Loumbila**, **Leo**, and **Bobo-Dioulasso** and supported 9 entrepreneurs, 55% of whom were women. In total, **19 beneficiaries** took part in a support model combining group training, organizational coaching, and individualized assistance. This momentum contributed to the **consolidation of 286 jobs** and was reinforced by the **provision of EUR 10,000 in seed financing.**

Implementation included **48 coaching sessions** that strengthened entrepreneurs' capabilities, improved the administrative and financial structuring of their businesses, and supported their **preparation for access to finance.** Nine financing applications were prepared and submitted, backed by introductions to financial institutions, and three **SMEs** were recognized for the quality of their progress. At the close of the program, the participating businesses were **durably positioned** to access **Oxfam's ECV** (Entreprises qui Changent les Vies) financing mechanism.

Implementation partners :

OXFAM

GARAPENERAKO LANKIDETZAREN EUSKAL AGENTZIA
AGENCIA VASCA DE COOPERACIÓN PARA EL DESARROLLO

B. FINANCING PROGRAMS

1. PME Performantes SCALE

› A financial innovation lever for resilient SMEs

The **PME Performantes SCALE** program embodies an integrated approach to accelerating SMEs in the water, sanitation, and hygiene (WASH) sector, grounded in financial innovation and strategic support.

Deployed through a structuring alliance among **ForthInvestment, Aqua for All, and Vitol Foundation,** SCALE offers a distinctive mechanism that combines financial engineering with hands-on support.

Implemented in **Burkina Faso** and **Benin**, the program supported **14 entrepreneurs** across several strategic hubs and mobilized approximately **EUR 300,000** through tailored financial instruments, including concessional loans, grants, and mezzanine debt. This targeted approach strengthened business structuring, facilitated access to finance, and supported the development of innovative solutions.

The program's results were concrete and measurable: **315,414 people** were impacted, and around **EUR 300,000** in financing was mobilized for SMEs. SCALE stands out as a growth engine by combining support with innovative financing solutions tailored to WASH-sector SMEs.

315 414 impacted people

300 000 € financing was mobilized for SMEs.

Implementation partners :

Aqua for All

Vitol Foundation

2. JOB AND BUSINESS BOOSTER:

The **Job and Business Booster (JBB)** program, implemented by **ForthInvestment** in partnership with the **Woord en Daad Foundation** and the **Challenge Fund for Youth Employment**, made a structured contribution to promoting youth employment through entrepreneurship by focusing on high-potential sectors such as agribusiness, waste management, and renewable energy. Across the full life of the program, the consolidated results show **436 businesses supported, including 220 led by women; more than 1,900 people trained; €189,800 in financing mobilized for SMEs; and 1,065 jobs created or consolidated, including 676 for young women.**

The program also strengthened the entrepreneurial ecosystem through business dialogues in Bobo-Dioulasso and Ouagadougou, the preparation of an advocacy note, and the holding of a closing workshop in June 2025, which helped capitalize on lessons learned and put the results into perspective. The program's performance and results earned the ForthInvestment and Woord en Daad consortium **second prize from the Challenge Fund for Youth Employment,** among five funded programs, confirming the relevance and impact of the JBB initiative.

3. ORANGE CORNERS INNOVATION FUND MALI:

The **Orange Corners Innovation Fund Mali** program, implemented jointly by **ForthInvestment, Zira Capital, and Fair & Sustainable**, and funded by **RVO (Netherlands Enterprise Agency)**, continues to pursue its ambition of sustainably structuring the Malian entrepreneurial ecosystem. Designed over six years, the program aims to support **189 high-potential businesses** by providing concrete tools to accelerate growth and strengthen resilience.

In **2025**, the program entered a key operational phase marked by the **completion of due diligences**, **the provision of financing** to selected businesses, and the **onboarding of a new cohort** receiving structured, customized support. These actions helped consolidate the foundations laid during the launch phase while ensuring the continuity and expansion of impact in the service of Malian entrepreneurship.

III

OUR CONSULTING MANDATES

Forth investment

1. ORANGE DIGITAL CENTER :

› Season 4 of Acceleration

Partner

As part of **Orange Digital Center**, **ForthInvestment** was mandated to support startups in strengthening their ability to raise financing. This strategic advisory assignment is designed to prepare entrepreneurs for investor engagement through the structuring of pitch decks, the development of financial plans, and the definition of coherent financing strategies.

In 2025, 6 startups were supported in Ouagadougou (5 led by men and 1 by a woman), with management training, the drafting of three pitch decks, field visits, preliminary diagnostics, and the creation of four data rooms, laying solid foundations for fundraising processes that are currently underway. The assignment will continue through the end of 2026.

2. Project for the Management of Communal Landscapes for REDD+:

Partner

PGPC/REDD+
Projet de Gestion durable des Paysages Communaux pour la REDD+

In 2025, our intervention in the bio-compost value chain moved into a new stage of scale. Building on our expertise in the **biodigester** sector, we fully operationalized our mandate within the **Project for the Management of Communal Landscapes for REDD+ (PGPC/REDD+)**, turning methodological frameworks into concrete results on the ground.

Our work included the selection of businesses and structured, targeted support for actors across the bio-compost value chain, including project maturation, and combined technical assistance, financial engineering, and capacity building. The tools that had been designed were deployed, adapted, and used to secure the structuring, sizing, and financing of sustainable projects, thereby creating the conditions for a **value chain that is economically viable and environmentally responsible.**

This momentum helped lay the groundwork for a better-organized local ecosystem capable of generating value, supporting the ecological transition, and attracting financing aligned with climate objectives. It illustrates our ability to deliver operational mechanisms, effectively support local actors, and help high-potential value chains emerge with measurable and lasting impact.

3. Market Study of High-Potential Value Chains in the Sahel Region:

› Strategic analysis in support of local investment

Partner

In 2025, **ForthInvestment** finalized the market study commissioned by **Cowater**, conducted in the municipalities of Dori, Falangountou, and Gorom-Gorom, turning field data into an economic analysis that can be directly used to guide investments and support programs. The study was carried out under the **Socio-Economic Flourishing of Vulnerable Populations in the Sahel** (ESEPV-Sahel) project, a multi-donor initiative co-financed by **Global Affairs Canada**, the mining company **IAMGOLD**, the **One Drop** Foundation, and the **Government of Burkina Faso**.

The work focused on the in-depth analysis of identified economic value chains, the assessment of their market potential across the entire value chain, and the identification of high-impact economic opportunities, especially for women and young people. This approach highlighted growth drivers, structural constraints, and the viability conditions of local economic units.

The study concluded with the production of the final market study report and the organization of a restitution session, providing a decision-support tool for technical and financial partners, investors, and public actors. The objective is to inform targeted and sustainable interventions that can help energize the local economies of Dori, Falangountou, and Gorom-Gorom.

4. TREMPLIN:

As part of a broader effort to promote local entrepreneurship and strengthen high-potential micro, small, and medium enterprises, **ForthInvestment** and **Massaka SA** were mandated by **Enabel in Burkina Faso** to implement **TREMPLIN**, an **18-month** media-driven entrepreneurship competition program for growing **MSMEs** in Boulgou, Kouritenga, and Ganzourgou provinces.

This structuring initiative is designed to sustainably strengthen the technical capacities of businesses in the target area and prepare them effectively for financing through a high-visibility capacity-building pathway built in the form of a competition. Activities will include the selection of **100 businesses**, targeted training sessions, a continuous evaluation and selection process, support for legal formalization, the opening of bank accounts, and the preparation of solid, bankable financing applications.

The program will be deployed in close collaboration with Graine SARL, the regional governors' offices, municipalities in the intervention areas, and the ministry in charge of youth, helping professionalize local MSMEs, strengthen their credibility with financiers, and stimulate a sustainable entrepreneurial dynamic in support of regional economic development.

Partners

5. Study on the Sustainability of Drinking Water Service in Ganzourgou and Zoundweogo Provinces:

In response to increasing challenges related to the **sustainability and professionalization of drinking water services in Burkina Faso,** ForthInvestment conducted a strategic study on behalf of **Eau Vive Internationale** aimed at sustainably enhancing the management of drinking water points, especially those equipped with hand pumps. Conducted in Ganzourgou and Zoundweogo provinces, the study aimed to establish a thorough diagnosis of current organization and management models while proposing a professional, viable, and inclusive model adapted to local realities. The results are expected to support the deployment of an entrepreneurial and innovative approach to water management, the professionalization of local actors, a structured fundraising strategy, and the measurement of the model's social and economic impact.

Partner

eau vive Internationale

6. Energy Enterprise Coach:

At the heart of the support system for businesses in the renewable energy sector, ForthInvestment serves as a pillar of the economic and operational structuring of SMEs participating in the **Energy Enterprise Coach (EEC)** program, implemented by NIRAS and funded by RVO.
Within this framework, ForthInvestment provided structured support to **seven SMEs** specialized in biodigester construction, combining in-depth diagnosis, financial structuring, and operational mentoring.
The interventions focused on the preparation of cash-flow plans, the definition of tailored support plans, and the delivery of mentoring sessions designed to strengthen the economic viability, execution capacity, and overall performance of participating businesses.
Activities were rolled out in **Tannounyan, Nakambé, Nando, Djôrô,** and **Bankui**, in partnership with SNV, within the broader **Energy Enterprise Coach** mechanism.

Partner

Energy Enterprise Coach

IV

SOME KEY EVENTS OF THE YEAR

Forth investment

1. Closing of the YEFFA Program:

Placing young people, and rural young women in particular, at the center of food-system transformation guided our participation on **March 28, 2025, in Ouagadougou** in a strategic **YEFFA** program meeting.
Alongside committed stakeholders and represented by **Sosthene Konde,** Director of Operations, we contributed to identifying practical levers for making economic opportunities more accessible, elevating local initiatives, and strengthening youth empowerment in rural areas. Backed by **AGRA** and the **Mastercard Foundation,** the initiative seeks to promote decent jobs and climate-resilient agricultural systems.

2. Global Leadership Meeting 2025 in Kyoto, Japan:

A major step forward was achieved for the impact investing ecosystem in Burkina Faso with the country's official accession to the **GSG Impact Partnership** at the conclusion of the Global Leadership meeting held in **Kyoto** from May 20 to 22, 2025. This recognition positions Burkina Faso as the sixth African country to join this leading international network, alongside South Africa, Ghana, Nigeria, Zambia, and Kenya. As a co-founder, active member, and board member of the **National Partner**, ForthInvestment contributed to this collective milestone alongside committed institutional actors, including the **West African Regional Stock Exchange** (BRVM) and **Nere Capital.** This dynamic reflects a shared ambition to mobilize public, private, and philanthropic finance and make impact investing a structuring lever for economic, social, and sustainable progress.
This step significantly strengthens ForthInvestment's international footprint and confirms its commitment to structuring credible investment frameworks aligned with national priorities and international standards.

3. African Diaspora Investment Symposium 2025 in Washington, D.C, USA:

Bringing together the talent, capital, and convictions of the African diaspora around a shared objective - accelerating impact and transforming the continent over the long term - was at the heart of our participation in the **African Diaspora Investment Symposium 2025**, a strategic dialogue space for visionary investors, committed leaders, and high-impact solution providers.

Held in **Washington D.C,** from **May 28 to 30, 2025**, the symposium reinforced a shared conviction: the diaspora holds unique potential to drive change, provided philanthropic and private resources are more effectively directed toward African entrepreneurs capable of responding concretely to local challenges. The discussions also underscored the need to build stronger bridges between diaspora investors and still-understructured economic opportunities across the continent.

Remittance flows, as important as they are, are not enough on their own. There is now a need to mobilize more financial capital and expertise into sustainable, structured investments that can scale for the benefit of SMEs and communities. This dynamic continues to inform our work to convert diaspora engagement into concrete, lasting, value-creating projects for African territories.

4. Global Entrepreneurship Congress in Indianapolis, USA:

Creating dialogue between African talent and the world's leading innovation ecosystems guided our participation in the **Global Entrepreneurship Congress,** held in **Indianapolis** from **June 2 to 5, 2025.** This international gathering brought together investors, innovators, and decision-makers committed to building the entrepreneurial economies of the future.

Our presence aimed to spotlight Africa's entrepreneurial potential by strengthening connections with international markets and placing high-impact African SMEs at the center of global innovation ecosystems.

The discussions helped identify concrete opportunities for partnership and collaborations in support of business growth across the continent.

5. Africa Impact Summit in Accra, Ghana:

From **June 11 to 13, 2025**, we took part in the **Africa Impact Summit in Accra**, a leading international gathering dedicated to systems transformation and large-scale impact in Africa.

As a member of the **GSG National Partner** in Burkina Faso, we joined strategic discussions alongside institutional actors, investors, and organizations committed to developing sustainable solutions for the continent. This participation strengthened our positioning as a committed impact investing actor promoting business models that combine performance, inclusion, and sustainability.
It also reflects our determination to contribute actively to pan-African efforts aimed at mobilizing capital, structuring local ecosystems, and supporting development pathways that generate lasting social and economic impact.

6. Invest in Burkina Faso International Forum:

Driven by the desire to promote a vision of investment that creates value while remaining firmly committed to development, we took part in the 2025 **Invest in Burkina Faso International Forum,** held from **October 9 to 11, 2025.** This flagship platform, supported by government and institutional actors, is dedicated to showcasing the country's economic opportunities and transformation levers. On this occasion, our General Manager, Massa BALIMA, spoke **as a panelist on October 10** during the roundtable dedicated to **private-sector promoters and financial institutions.** The discussions focused on essential topics such as **financing mechanisms, access to capital, and public-private partnerships** as levers for sustainable and responsible investment.
This intervention provided an opportunity to share a structuring approach to impact investing grounded in field experience, financial innovation, and support for local businesses. It highlighted the decisive role of a responsible private sector in creating durable jobs and strengthening national competitiveness, while underscoring the importance of continuous dialogue among investors, financial actors, and entrepreneurs.

7. 12-Hour Engineer Entrepreneur Challenge - 2iE:

Innovation takes on its full meaning when it is carried by talent that is supported and heard. In that spirit, we participated on **November 13, 2025,** in the 12-Hour Engineer Entrepreneur Challenge organized by the International Institute for Water and Environmental Engineering (2iE).
As a jury member, our General Manager, **Massa BALIMA,** assessed projects led by young engineers driven by a shared ambition: to propose practical solutions to the continent's economic, social, and environmental challenges. The ideas presented reflected a remarkable ability to turn engineering and innovation into levers for impact.
This involvement reflects our expertise in identifying, supporting, and structuring high-potential projects. It confirms our commitment to strengthening an entrepreneurial ecosystem in which emerging talent is supported in turning creativity into durable, value-creating solutions.

8. National Digital Week:

Financing innovation in Burkina Faso requires far more than the simple availability of funding. During National Digital Week, we emphasized that preparing startups from governance to execution capacity is the true driver of investor confidence. Today, the idea alone is no longer enough; it is the resilience of the model and the quality of execution that turn potential into lasting success.

9. Closing Seminar for the Water Cycle and Climate Change Project:

Invited by the **French National Research Institute for Sustainable Development (IRD),** we spoke on **November 24, 2025, at Cheikh Anta Diop University** in Dakar during the closing seminar of the Water Cycle and Climate Change (CECC) project, which focused on the water life cycle.
During an exchange bringing together researchers and water professionals, we highlighted a decisive lever for SMEs in the sector in West Africa: access to financing depends on their ability to translate scientific and technical impact into a credible climate case that is measurable and aligned with the expectations of investors and donors.
This intervention reinforced our positioning as a reference player in financial structuring and opened new avenues for collaboration, further strengthening our acceleration and financial engineering mechanisms dedicated to the water sector.

10. ChangeNOW in Paris, France:

ForthInvestment, which benefited from support from the Roddenberry Foundation through its **+1 Global Fund program,** took part in ChangeNOW, one of the leading international gatherings dedicated to impact solutions. For this edition, our two co-founders, **Massa BALIMA** and **Landry PARKOUDA,** shared ForthInvestment's vision with a global ecosystem of committed stakeholders.
The event proved to be a strategic networking lever, with around fifteen meetings held with investors and funds seeking innovative solutions in Africa. At the same time, constructive dialogue was initiated with NGOs active in areas including climate, youth employment, and women's empowerment. Participation in thematic panels also deepened our understanding of ecological innovations emerging from East African ecosystems.

11. Educational Initiatives in Support of Entrepreneurial Development:

Launched in November 2025 for a six-month period, this training module on entrepreneurship and project structuring is led by Landry PARKOUDA at Institut Supérieur de Technologie (IST). In line with ForthCommunity's mission, this initiative aims to concretely equip future entrepreneurs, preparing them for market realities and the requirements of accessing financing.

The main objective was to support students in maturing their projects, from idea to first revenue. Through a highly practical approach, they learn how to turn intent into a viable venture, clarify the value created, strengthen their business model, and lay the foundations for a financeable project. The courses will continue in 2026.

V. OUR IMPACT MISSION

We work alongside African entrepreneurs to drive a positive and lasting transformation of the continent. By fostering the emergence of inclusive, responsible, and high-performing businesses, our actions are fully aligned with the achievement of the Sustainable Development Goals (SDGs).

Our interventions are designed to deliver five core impact objectives :

- Improve financial inclusion for SMEs
- Create and sustain stable, decent jobs
- Promote responsible business practices
- Boost the creation and growth of high-impact SMEs
- Support the development of women's entrepreneurship

ANNUAL REPORT 2025

VI. OUR KEY SUCCESSES AND IMPACT HIGHLIGHTS

6,000,000 €
raised to support and finance entrepreneurs

700+ businesses
in our support portfolio

2,500+
jobs created or consolidated

2,000+
people trained

627,850
people impacted in essential sectors such as WASH, agribusiness, and renewable energy...

VII. OUR OUTLOOK

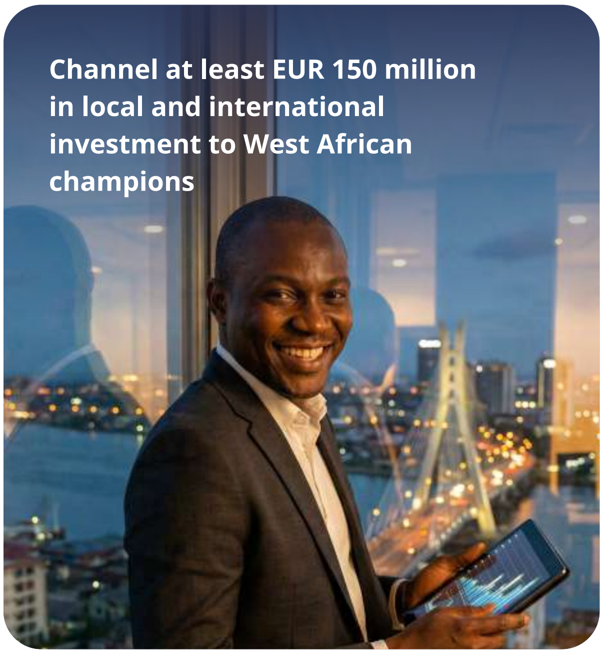
Building on the momentum of 2025, ForthInvestment is looking ahead with a clear vision, stronger ambitions, and structured priorities. Our strategic priorities for 2026 and beyond are :

Strengthen our positions in Benin and Côte d'Ivoire

Deploy new investment vehicles across West Africa

Launch new acceleration programs by diversifying both sectors of activity and implementation partners

Channel at least EUR 150 million in local and international investment to West African champions



Together, these priorities reinforce our ambition to become one of West Africa's most promising investment holdings by creating, advising, and financing businesses that effectively address the continent's social, environmental, and economic challenges.

VIII. OUR TEAM

Powered by a team of around twenty professionals with complementary skills, our organization relies on the commitment, diversity, and passion of its people to drive and accelerate lasting socio-economic transformation across the continent.

Aristide SOME
Project Manager

Sosthene KONDE
Director of Operations

Ophélie KABORE
Head of Business & Project Development

Reine Alexandra ABO
Head of Fundraising

Landry PARKOUDA
President

- **15 years** of experience in **finance** and impact investing
- Country Lead for Investisseurs & Partenaires in Burkina Faso, Mali, and Niger
- More than **EUR 150 million** in co-invested and co-managed assets
- Manager in Financial Audit and Risk Management at **PwC France**
- Sustainable Leadership - **HEC Paris**
- Graduate degree in Management Science - **Paris-Dauphine University**

Massa BALIMA
Managing Director

- **Deep expertise** in the entrepreneurial ecosystem and key stakeholders in Burkina Faso and West Africa
- **15 years** of experience in management and product launches in France and Canada
- **International consultant** for AK-Technologies
- Executive MBA - Université du Quebec a Montreal (UQAM)
- **Engineer** in electrical and embedded systems (France)

Behind these results stands a force that is often invisible but decisive:

a committed network of more than 50 high-level leaders and executives from the African diaspora. Their careers shaped by leadership positions at institutions such as IFC, AfDB, Google, Accenture, Deloitte, and Ecobank.

IX

APPENDIX: SOME OF THE SMES WE SUPPORTED IN 2025

Forth investment

LIVESTOCK

FERME DU NORD :

A specialist in Black Soldier Fly valorization, FERME DU NORD transforms waste management into a strategic protein resource for animal feed. Its expertise also extends to precision greenhouse design and the transfer of know-how through high-quality technical training. By combining innovation and sustainability, it lays the foundations for high-performing circular agriculture that respects the environment.

VNO AVICULTURE :

VNO AVICULTURE energizes poultry production through a specialized offering of high-performance feed and inputs. The company deploys a full range of nutritional solutions designed to meet the specific needs of chickens and guinea fowl. By ensuring healthy growth and optimal productivity, it effectively supports the profitability and development of poultry farms.

SERVICE AGRO ELEVAGE :

SERVICE AGRO ELEVAGE turns the potential of agricultural and livestock value chains into concrete results. It combines strategic advisory support with close monitoring of operations while ensuring access to high-quality inputs. Through this hands-on support, it serves as a driver of technical performance and profitability for rural actors.

RENEWABLE ENERGY

FASO ENERGIES EQUIPEMENTS ET SERVICES (FEES) :

A committed player in the energy transition, FEES SARL deploys innovative solar solutions in rural and peri-urban areas. It installs high-performance equipment that guarantees lasting access to electricity, a critical driver of social and economic development. Through this technological commitment, it tangibly improves living conditions and helps lay the foundation for a greener, more inclusive future.

G-TYAM :

G-TYAM brings a new vision to architecture by placing bio-based materials at the heart of every project. Through the use of compressed earth bricks and eco-responsible paints, the company designs buildings that breathe and endure. Aligning technical quality with respect for nature creates living spaces where modern comfort no longer comes at the expense of the environment.

WESTECH BURKINA

WESTECH BURKINA offers end-to-end expertise to advance the energy autonomy of economic and social actors. From advanced engineering to rigorous maintenance, it handles the installation and commercialization of highly reliable solar systems. By integrating a strategic training component, it ensures not only access to clean electricity but also the durability and technical mastery of the infrastructure it develops.

WASH
(water, sanitation, and integrated water resources management):

SDS :

SDS breaks the barriers of water isolation by deploying drinking water distribution solutions close to underserved populations in unplanned urban areas. It ensures continuity of service through household connections and optimized neighborhood water points. Securing this vital supply acts as a lever for public health and dignity, durably transforming the daily lives of urban households.

FEDIS :

FEDIS strengthens health outcomes by deploying innovative and durable water filtration solutions. It designs high-performance equipment tailored to household realities, ensuring immediate access to safe drinking water. Through a simplified technological approach, it removes logistical and financial barriers and gives families reliable access to a vital resource.

FARAFINA :

FARAFINA brings new momentum to vulnerable areas by deploying high-quality sanitation and water infrastructure. It combines the innovation of SIM-SAN systems with solid expertise in boreholes, drinking water supply systems, and irrigation networks. By linking modern sanitation with strong water management, it protects community health and creates an environment that supports economic and agricultural growth.

BIODIGESTER

GREEN STAR BIO :

Based in Bogande, GREEN STAR BIO has become a driving force for ecological resilience in the East and Southwest regions. Through the construction of innovative biodigesters, it turns climate challenges into opportunities, sharply reducing greenhouse gas emissions while helping curb deforestation. By offering a sustainable energy alternative, it protects Burkina Faso's natural heritage and durably improves living conditions for rural communities.

TELADO GLOBAL BULDING BUSINESS (TGBB):

At the heart of the Nakambe region, TELADO GLOBAL BUILDING BUSINESS (TGBB) stands out as a trusted ally for agricultural performance. It deploys high-quality fertilization solutions designed to restore soil vitality and maximize producers' yields. By balancing immediate productivity with ecosystem preservation, it lays the foundations for agriculture that is sustainable, prosperous, and resilient.

CENTRE DE RESSOURCES ET DE CONSTRUCTION DE BIODIGESTEUR / ENERGIE RENOUVELABLE (CRCB) :

CRCB is reinventing daily life for households in Nazinon by putting biological innovation to work for household independence. Through high-performance biodigesters, it enables families to convert organic residues into dual value: clean biogas for cooking and powerful natural fertilizer for fields. By linking the energy transition with agricultural performance, CRCB strengthens lasting autonomy that protects the environment while boosting rural incomes.

AGRI-FOOD PROCESSING

YOYONTE :

Based in Ouagadougou, YOYONTE turns orange-fleshed sweet potato into a healthy and innovative food experience. From crispy chips to nutritious bread, the company elevates this local treasure into products with strong nutritional value. By combining artisanal know-how with public health standards, it supports local value chains and stands out as a reference in responsible and inclusive agri-food processing.

DAN AGRO :

DAN AGRO has become a benchmark in agri-food processing by turning local cereals and peanuts into a range of high-value products. From smooth peanut paste to distinctive artisanal cookies, each creation celebrates the richness of the local terroir. By combining nutritional rigor with culinary enjoyment, the company transforms local raw materials into healthy solutions while promoting national know-how.

EDEN VITALITÉ :

EDEN VITALITE reinvents the world of herbal infusions by elevating the potential of therapeutic and medicinal plants. The company turns ancestral heritage into a premium range in which every blend is carefully selected for its purity and effectiveness. By combining botanical expertise with sensory enjoyment, it offers a natural and targeted response to contemporary well-being needs.

COLIBRI AGRO :

COLIBRI AGRO leads in sustainable innovation by turning moringa into a premium line of products that promote well-being and nutrition. Beyond processing, the company serves as a hub of expertise for the rural economy, offering advanced agronomic services such as bio-inputs, nursery development, and certified training. By combining industrial expertise with soil regeneration, it has created a unique value chain that helps shape the future of agriculture and public health.

Together, let us create greater impact.

Join us.
